MARKER

SCREW GUN

TORQUE SCREWDRIVER

BEFORE BEGINNING INSTALLATION, **OPEN AND INSPECT ALL PACKAGES** TO ENSURE ALL PARTS LISTED ON THE PACKING LIST ARE INCLUDED AND UNDAMAGED.

IF ANY ITEMS ARE MISSING OR DAMAGED, CONTACT NAVY ISLAND AT (651) 451-4454.

Panel Preparation

« If panels are sequence matched, location label can be found on the back of the panel. Sequenced panels **must** be installed according to the shop drawings. If at any point the shop drawings differ from these instructions, follow the shop drawings. If you cannot locate them, contact Navy Island for a copy before attempting to install.
! Before starting installation, ensure all wet work such as taping, painting, etc. is complete.

1 Lay the panel face down on a soft surface and find the panel label. Orient the panel per the shop drawings to ensure correct grain direction when installed.

💡 For edgebanding and field modifications, please see install instructions: "SoundPly Cutting & Edgebanding Instructions"

2 On panels larger then 16" wide place Z-clips 3" OC from each edge of the panel, a max of 36" between vertical clips and a max of 24" between horizontal clips.

« On panels less than 16" wide Z-Clips must be 3" OC from each edge of the panel, or if using Z-Bar cut each Z-Bar 2" shorter than panel width.

3 Using a low speed and the lowest torque setting, screw in each Z-clip using supplied anchor screws.

! *To ensure that the screws are not over tightened, use a torque limiting screw driver set to no more than 6 inch-pounds.*

Wall Preparation

4 When hanging Z-Bars, the Z-Bar should correspond with the spacing of the Z-Clips.

Anchor points on a single Z-Bar should be no more than 16" apart.

! *The head of the screw fastening the Z-Bar to the wall must be flush or below the surface of the Z-bar; otherwise the panel will not sit flush.*

Panel Installation

5 Once the Z-bar and Z-clips are installed, lift panels so that the Z-Clips clear their corresponding Z-Bar. Gently press the panel into the wall and lower until Z-Clips are resting in Z-Bars.
