FROM FIRST IDEA TO FINAL INSTALL

Every project is constrained by budget and time. By talking with us, we tailor each solution to be cost-effective and deliver to construction deadlines. Collaborate with our team of Drafter in Revit so every cut, fold and hardware attachment detail are clearly depicted in your drawings.

The information in this document is subject to change without notice.
Navy Island assumes no responsibility for any errors that may inadvertently appear within this document.

Plank thickness may vary up to 1/16" from nominal due to the soft material core. Additionally, caution should be taken when installing hardware, such as the Reveal Plank Clip for ceiling planks, to maintain consistent positioning. When planks butt end-to-end, we recommend thin shims for field adjustments as needed.

ADD ILLUMINATION

Cella Lit baffles are available with integrated direct, indirect & bidirectional lighting.
